Mobile Application – Learning Mathematics

Privacy Policy

Introduction

- This application respects your privacy and protects your personal data. This privacy policy explains what information we collect, how we use it, and how we safeguard it.

- Users will be informed about the privacy policy upon the first launch of the app after installation.

- The privacy policy may be updated; please regularly check its version. The app will notify users of any new conditions upon the first launch after an update.

Collection of Personal Data

- **No collection of personal data:** Our app neither collects nor sends any personal data from users.

- We do not require names, email addresses, or any other personal information.

- **Payments processed by Google:** Payment transactions will be directly handled by Google, and we are not responsible for them.

Use of Personal Data

- Your personal data will not be used; the app does not acquire any personal information.

- Personal data used for payments is processed by Google.

· Transparency and Choice

- Users will be informed during the first app launch that no personal data is collected.

Content and Purpose of the App

- The app focuses on teaching mathematics from the basics.

- Its goal is to provide digital support for education, whether for learning or practice.

- The app's content is available offline upon initial installation and only requires an internet connection for necessary updates.

Age Restrictions

- The app is suitable for both children and adults and has no age restrictions.

- It does not collect any age-related personal data.

- The app's content caters to both children and adults and does not provide explicit material.

Security Measures

- The app does not request any permissions for Android access (e.g., camera, calls, SMS, files).

- Internet connectivity is not required for the app's functionality.

- All app content is downloaded through the Google Store.

- The app does not transmit any usage information.

Advertisements

Our application contains advertisements managed by Google. These ads are designed to be suitable for children, meaning they do not contain any inappropriate or explicit content. The ads may be personalized based on anonymous data collected by Google. Below is a more detailed explanation of how the ads work and what data may be used:

- **Types of Ads**: The ads displayed in our application may include banners, interstitial ads (full-screen ads), and video ads. These ads are selected to be relevant and appropriate for all age groups, including children.

- **Ad Personalization**: Google may personalize ads based on anonymous data such as user interests, demographic information, and previous interactions with ads. This data is collected anonymously and is not linked to any personal information of the users.

- **Privacy Protection**: Google adheres to strict privacy and data security policies. The anonymous data used for ad personalization is collected and processed in accordance with applicable data protection laws and regulations.

- **Safety and Appropriateness**: The ads displayed in our application are regularly reviewed to ensure they are suitable for children and do not contain any inappropriate content. Google has strict policies for advertisers that must be followed for their ads to be approved for display in applications intended for children.

- **App Purchase**: In the event of purchasing the application, all ads are disabled. The application then becomes fully self-sufficient and can be used offline without any internet connection. This ensures complete privacy and security for the users.
